

**There is much froth in media headlines as the US sub-prime issues continue to unsettle investment markets globally. HOWEVER, as usual, the falling prices in good quality stocks and funds, represents one thing – A GOOD BUYING OPPORTUNITY!! YOU CAN TELL YOUR CLIENTS TO KEEP THEIR COOL AS HELP IS AT HAND!!**

Lower stock and fund prices will mean investors will get more for their money and they can gain from the recent turmoil as indices are certain to settle and then rise sometime in the future-we don't know when that will be, just yet.

**This also creates an interesting scenario for WIN WIN.**

Remember, Win Win offers 25% annual bonus coupons provided a basket of 20 global blue chips remain above their respective barrier prices. A Second Chance facility enhances this product greatly by paying out any rolled-over coupons at the end of the final year (after five or ten years). Very importantly there is full capital protection at maturity on the net investment which ensures the investor's maximum downside is they'll simply get their money back, less the initial charge agreed with their adviser.

The upside is that they stand to receive a number of generous annual bonus coupons of 25% (back testing indicates there's a high probability of that being all of them!), either at the end of each year or at maturity along with their money back. NOT MANY INVESTMENT VEHICLES OFFER SUCH GREAT TERMS AND ARE BACKED BY A WORLD-CLASS, AA+ RATED BANK.

And the beauty of it is that after the current turmoil, the strike prices for our next Note, Series 7 Issue 3, will be **LOWER** giving investors a better chance of winning all of the available bonuses. Furthermore, improved bond yields may even mean the barrier level will itself be further reduced; we expect it to be around 75%.

**This Note with these double pluses on-board will be closing in the next few weeks so now's the time to get your clients in on it.** It's a USD issue and you can buy your clients in with a minimum of \$70,000 directly or \$20,000 via a life company bond or pension scheme.

**Furthermore, the investor is in control of the ride!**

This is not a "kick-out" product which forces the contract to end just as it gets going. The investor can choose to stay invested for as long or as short as they want as a secondary market is available after just a year and a day!

**This is something really positive you can tell your clients and something to blow away that froth!**
